

October 31, 2005

Executive Summary:

Evaluation of yesjobsearch.com

In October of 2005 WebAIM was contracted by YES to verify that their site meets the standards of Federal Section 508 §1194.22 of the Rehabilitation Act. It was the responsibility of yesjobsearch.com to provide WebAIM with a list of unique pages. There were 22 pages identified by YES, all of which were reviewed by WebAIM.

Based on the information provided, WebAIM verifies that the yesjobsearch.com *complies* with all 16 standards of Section 508 §1194.22 of the U.S. Rehabilitation Act of 1998. This evaluation and verification occurred on October 31, 2005.

WebAIM cannot verify that any changes to the site made after October 31, 2005 conform to Section 508 §1194.22, nor can WebAIM verify that this site exceeds the standards laid out in Section 508 §1194.22.

Evaluation by Section 508 §1194.22 standard

(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).

PASS: All elements have adequate alt text.

(c) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.

PASS: All multimedia includes captions, or where appropriate, a transcript.

(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.

PASS: All information conveyed is available without color.

(d) Documents shall be organized so they are readable without requiring an associated style sheet.

PASS: There are no examples of confusing or missing information if style sheets are disabled.

(e) Redundant text links shall be provided for each active region of a server-side image map.

PASS: There are no server-side image maps.

(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.

PASS: There are no server-side image maps.

(g) Row and column headers shall be identified for data tables.

PASS: Data tables have appropriate row and column headers.

(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.

PASS: There are no data tables with multiple headers.

(i) Frames shall be titled with text that facilitates frame identification and navigation.

PASS: This document does not contain any frames.

(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.

PASS: There are no pages with screen flicker within this range.

(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.

PASS: This site does not offer any text-only pages.

(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by assistive technology.

PASS: All the information provided by the scripting languages can be read by assistive technologies.

(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).

PASS: Java applets, scripts and plug-ins and the content within them are accessible to assistive technologies.

(n) When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.

PASS: All form elements have appropriate labels.

(o) A method shall be provided that permits users to skip repetitive navigation links.

PASS: There is a method to skip repetitive navigation links.

(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.

PASS: No timed responses are required.
